### WHICH SIZE

| Size          | Good for                                                     |
|---------------|--------------------------------------------------------------|
| 1 kg and 2 kg | Cabins, reception desks, nurse stations, single server racks |
| 4 kg          | Server rooms, labs, hotel floors                             |
| 6 kg          | Larger rooms, corridors and equipment halls                  |

### SUITABLE FOR

- **Data centres and server rooms:** no powder on servers, and a finish that suits a clean technical space.
- **Hospitals, clinics and diagnostic labs:** no residue on costly equipment, and a body that can be wiped down often.
- **Hotels, lobbies and premium offices:** fits the interior instead of standing out as a red cylinder.
- **Research labs and coastal facilities:** resists the humid and salty air that rusts painted steel.
